

# Trial Specialist

**Location: California (state-wide and international travel required), 100% full-time**

## Position Summary

California Berry Cultivars (CBC) is seeking a motivated and experienced bilingual **Trial Specialist** to join our strawberry breeding and research team. This position plays a critical role in coordinating and managing CBC's external variety trial network across major strawberry production regions in California and beyond, with an international focus on Spanish-speaking markets. The Trial Specialist will oversee the planning, setup, and evaluation of field trials to assess experimental and commercial varieties under real-world production conditions. This role requires hands-on field work, scientific rigor, and strong collaboration with growers, researchers, and the breeding team. The position offers excellent opportunities for professional growth within CBC's expanding breeding and research programs.

## Applicants

Please send your resume and cover letter to: [admin@cbcberry.com](mailto:admin@cbcberry.com)

The position is open for immediate fulfillment to the right candidate, and we will continue to collect applications until the position is filled.

---

## Key Responsibilities

- Coordinate and manage CBC's external trial network in key U.S. and international strawberry growing regions.
  - Plan trial designs, planting schedules, and data collection protocols in collaboration with breeding staff.
  - Oversee planting, maintenance, and harvest evaluations in partnership with cooperating growers.
  - Regular field visits to monitor plant performance, collect data, and ensure trial consistency and accuracy.
  - Supervise and coordinate interns and technical assistants involved in trial management and data collection.
  - Compile, analyze, and summarize trial results for internal review and breeding decision-making.
  - Assist in developing and refining field trial methodologies, scoring systems, and research protocols.
  - Maintain detailed records and documentation of all trial activities and observations.
  - Collaborate with external partners, universities, and research organizations on special trialing projects.
  - Communicate trial progress and findings to breeding team and management.
- 

## Qualifications & Skills

- Master's degree in Plant Science, Agronomy, Horticulture, Plant Breeding, or related agricultural discipline (exceptional candidates with Bachelor's degree and relevant experience may be considered).
- Four or more years of hands-on experience with agricultural research trials, preferably in berries or other specialty crops, with strong understanding of experimental design, statistics, and field research protocols.
- Prior experience with strawberry cultivation, evaluation, or breeding programs preferred.
- Experience supervising interns, seasonal staff, or coordinating with external collaborators preferred.
- Excellent organizational, observational, and analytical skills with strong attention to detail and effective written and verbal communication abilities.
- Ability to work independently and manage multiple trial sites simultaneously.
- Proficiency with data collection tools, spreadsheets, and agricultural software.

- Spanish language proficiency required.
- Valid driver's license, clean driving record, and professional references required.

---

## Physical Requirements

- Ability to work outdoors in field settings for extended periods during planting and harvest seasons.
- Tolerance for working in variable weather conditions including heat, cold, wind, and rain.
- Ability to stand, walk, bend, and kneel repeatedly while conducting field evaluations.
- Manual dexterity for handling plants, collecting samples, and recording field data.
- Ability to lift 50 lbs. occasionally (equipment, plant materials, harvest samples, etc.).
- Visual acuity for assessing plant characteristics, fruit quality, and disease symptoms.

---

## Work Environment

- Field and greenhouse settings across multiple growing regions.
- Frequent travel required during planting seasons (fall/winter) and harvest seasons (spring/summer).
- Overnight travel required for distant trial locations.
- Office work for data compilation, analysis, and reporting.
- Interaction with growers, farm managers, and research cooperators at trial sites.
- Peak work periods align with strawberry production cycles and may require flexible scheduling.

---

## Compensation

- Competitive salary commensurate with experience and qualifications.
- Medical, dental, and vision coverage.
- Basic Life and AD&D insurance.
- 401k company match.
- 2 weeks of paid time off, paid-sick leave, & paid holidays, increases with tenure.
- We also provide numerous opportunities to build your skills.

---

## Employment Type

- Full-time, exempt position.
- Employment is at-will in accordance with California state law.

---
